

MECKLENBURG COUNTY Public Health

Immunization Nurse

POSITION SPECIFIC INFORMATION

As a nurse in the Immunization Clinic, we administer vaccines to all ages to prevent illnesses and diseases. A typical day for an Immunization Nurse includes reviewing each patient's vaccine record and making sure that we give the right vaccine to the right patient at the right time. We also provide patient education, referrals to other health services, and foreign travel consults for those traveling to other countries.

The majority of our services are provided during regular business hours, but our nurses work at least one evening clinic each week. Sometimes our nurses are called upon to set up and staff special immunizations clinics for threatened outbreaks of diseases, or to help school children become compliant with the NC Immunization Law. In these incidences work hours will include after hours, weekends and holidays as necessary depending on work requirements within the clinics and staffing needs during a public health response or other public health event.

Minimum Qualifications:

Experience: 1 year community health experience, preferred.

Required Education: Completion of an accredited Nursing program. BSN highly desired. Non-BSN requires completion of state "Introduction to Public Health Course" completed within one year of hire date.

Licensure/Certifications:

- Current unencumbered RN license issued by the NC/SC Board of Nursing or Multi-compact state.
- Current American Heart Association CPR certification.
- Valid NC/SC driver's license and the ability to obtain a county operator's permit may be required

Additional: Capability to serve a diverse population as indicated by age, developmental stage, race and ethnicity. Ability to be flexible and the willingness to provide nursing services in diverse community settings.
