RA = Record Audit	

Instructions: This tool is a template and should be modified by each health department to reflect the agency's policies and practices. It is intended to assist in assessing the competency/clinical skills of nurses and those in enhanced role (ERRNs) positions working in Maternal Health Clinics. This or a similar tool should be completed annually in an effort to ensure the delivery of high-quality patient care services.

A specific checklist for patient physical assessment by the ERRN is not included. It is recommended that agencies use the tools previously provided through the MH ERRN Training Program for this portion of the ERRN's competency assessment.
